

Financing Energy Efficiency
July 19, 11:00 AM – 1:00 PM CT
Embassy Suites, Huntsville, Alabama
Lunch provided

Attend Event

[Click to register \(no cost\)](#)

A workshop provided by the Tennessee Valley Authority and its power distributors in Alabama

Several resources are available to Alabama commercial and industrial customers for making energy efficiency improvements. This workshop will feature a variety of tools to help you make improvements that will lower your energy costs.

Many of these resources are available only to Alabama companies, so please take advantage of the resources available to improve your organization's competitiveness.

Please RSVP at this link: <http://tva.eventbrite.com>. There's no cost, and lunch is provided!

Please join us!

Topics

AlabamaSAVES

AlabamaSAVES is a loan program for commercial and industrial customers in Alabama. This program offers terms of 2% interest for up to ten years, and a minimum loan amount of \$50,000.

Metrus Energy

*Metrus Energy received a \$2 million allocation from the State of Alabama to help commercial & industrial customers in Alabama implement energy efficiency projects with **no capital outlay**. Metrus works with clients to install energy efficiency improvements and pay for those improvements with avoided energy costs.*

Energy Right Solutions for Business

Energy Right Solutions for Business is TVA's new commercial and industrial energy assessment and incentive program for energy efficiency improvements. Customers may receive incentives of up to 5¢ per kWh based on first-year savings.

Alabama Technology Network

The Alabama Technology Network offers several services to Alabama companies to help improve their operational, energy, and environmental performance.

USDA Rural Energy for America Program

Small Business Administration Initiatives (Tentative)
